INTERSHIPS AND PROJECTS

Internships	ProAzure Software Solutions Pvt. Ltd. (Duration December 2024 - January 2025) We collect the data of sold cars from USA in the format of .csv and using python and it's libraries we sort that data and create graphs like which car solds the most and in which place and for what price. We also store that data in binning and divide them into three parts like the cars which solds in low price are added to Low, And the cars which solds to high price in High and remaining cars in medium. And based on that data we created the bar graphs which shows the solds car in the bars like which domain has done great sale's. We created heat map, regression analysis, and scatterplot maps. Which helps vehicle agencies or automation agencies to know about the sales data. We also compares the cars based on there price, body type, Drive, fuel, and Engine size.
Projects	Exploratory Data Analysis (Duration December 2024 - January 2025) We collect the data of sold cars from USA in the format of .csv and using python and it's libraries we sort that data and create graphs like which car solds the most and in which place and for what price. We also store that data in binning and divide them into three parts like the cars which solds in low price are added to Low, And the cars which solds to high price in High and remaining cars in medium. And based on that data we created the bar graphs which shows the solds car in the bars like which domain has done great sale's. We created heat map, regression analysis, and scatterplot maps. Which helps vehicle agencies or automation agencies to know about the sales data. We also compares the cars based on there price, body type, Drive, fuel, and Engine size.
