Objective

To work with sheer determination and passion in a team-oriented and challenging environment where my talent is not only utilized but also nurtured, contributing to the development of the organization.

Education

Bachelor of Technology in Computer Science and Engineering

Dr. Babasaheb Ambedkar Technological University, Lonere

2019 - 2022

Diploma in Computer Technology and Engineering

Autonomous Institute of Technical Education, Nashik

2015 - 2019

Work Experience

SAP Consultant

Suzlon Wind Energy Pvt. Ltd.

May 2023 – Present

- Over 1.5 year of experience in a manufacturing company.
 - Managed data entry and system updates in SAP software, ensuring accurate record-keeping and efficient operational workflows.
 - Key tasks included data verification, system troubleshooting, and report generation.
-

Technical Skills

- **Programming Languages:** Java, PHP, JavaScript
- **Web Technologies:** HTML, CSS, JSP, Servlets, J2EE
- **Databases:** MySQL, JDBC
- **Tools & Frameworks:** SAP, Maven
- **Design Patterns:** MVC, DAO-DTO

Certifications

- Artificial Intelligence (Dell Certificate)
 - Full Stack Developer (Qspiders Training Institute)
 - PHP Training Certification
 - Microsoft AI classroom Series
 - HTML Essential Training
 - Machine Learning with Python (Skills Build)
-

Projects

Book Store App (Advanced Java)

- **Role:** Lead Developer
- **Technologies Used:** JavaScript, Servlet, JSP, J2EE, MySQL
- **Description:** Designed and developed a clean and modern website for a virtual bookstore, allowing users to browse, search, and purchase books online.
- **Key Contributions:**
 - Implemented a user-friendly interface with dynamic content updates.
 - Developed backend services to handle user authentication, book catalog management, and order processing.
 - Ensured data integrity and security using MySQL for database management.

Toxic Comments Identification

- **Role:** Developer
- **Technologies Used:** Python, Natural Language Processing (NLP)
- **Description:** Built a system to identify and filter toxic comments in web chats to protect users from online abuse and trauma.
- **Key Contributions:**
 - Implemented machine learning models for text classification to detect toxic comments.
 - Integrated the solution into existing chat platforms, ensuring real-time monitoring and filtering.
 - Optimized algorithms for better accuracy and reduced false positives.

Banking System API

- **Role:** Backend Developer
- **Technologies Used:** Core Java, JDBC, Maven, MySQL
- **Description:** Developed a comprehensive API for a banking system, enabling efficient handling of user accounts, transactions, and balance inquiries.
- **Key Contributions:**
 - Designed and implemented API endpoints using DAO-DTO design patterns for modular and maintainable code.

- Ensured robust data management with transaction support and error handling.
- Collaborated with frontend developers to integrate APIs into a user-friendly interface.
